## ASSOCIATION FOOTBALL SUMMED UP BY AN EXPERT

L. G. Blackman, Gives Good Advice in the Last of His Series of Articles on the Great Game Which He Has Contributed to This Paper.

The following is the last of the series of articles on Association football by L. G. Blackman:

It has been the object of the preceding articles to give to the novice some of the most essential points to be remembered in each department of Association football. Practical experience is, however, the only school in which much can be learned, and no amount of written direction can produce the effect which a few practice games will. Intelligent observation of the play of a good player is very helpful, and many useful points may be learned by this means.

There is, perhaps, no game in the world in which a beginner may obtain a respectable degree of proficiency in so short a time as Association football. The intense enjoyment which is derived from its exercise by a player of moderate abilities is sufficient reason for the great popularity of the game.

The correct position in the field for a player is the right wing forward. With the help of an old player, the play of passing will be at once understood, and the general scheme of the game will be acquired. A beginner should not overburden himself with too many rules, and will find the application of common sense will overcome him clear of difficulties. He should get the ball through the regular and orderly determination, a moderate amount of strategy will produce a useful player.

A few games at forward play will back division may be essayed. Little use attempting full-back until a thorough mastery of the game is obtained. Backs as a rule are seldom from forwards and it is seldom that backs take a forward position with great success.

**VALUE OF SCHOOL FOOTBALL.**

One of the greatest assurances of the success of a game is its popularity among boys at school. The love of active control in early youth is universal, and those institutions into which Association football is introduced will be producing year by year a number of players to recruit and strengthen the teams of the senior clubs. Every effort should be made by those interested in the game to encourage its popularity with boys. When the general scope of the game is understood, youngsters will derive the most enjoyment from kicking an old ball and, and the practice may be acquired in this way, and the control which is obtained will be of great value which cannot be secured in after years.

**LEAGUE SYSTEM.**

It has been found wherever there are sufficient number of clubs that the most successful Association football is played by the establishment of a league system of match playing. In this system each club plays each other twice. Two points are earned for each victory, and one for each draw. The club obtaining the highest number of points for the season is the champion of the league, and may hold a challenge trophy until the next club displaces it from the head of the league.

With the commencement of the year there will certainly be three or four leagues in existence in Honolulu, viz., Scotland, England and Iolani.

The latter will combine both past and present members of Iolani College, the senior and junior matches will be played by the senior and junior clubs. The latter will combine both past and present members of the college of the same name, and the latter will combine both past and present members of the college of the same name, and the latter will combine both past and present members of the college of the same name.

### REPARTEE.

Observing the manager of the drug department, the woman accosted him in a spirit of badinage.

"I have kleptomania," she said. "What would you advise me to take?"

"The elevator, by all means," said the manager, wittily.

"And not something just as good?" exclaimed the woman, affecting great surprise.—Detroit Journal.

## BIG TWO DAYS RACE MEET AT THE KAPIOLANI TRACK

Honolulu Driving Association Practically Decides To Spread the Events of the Program Over Wednesday and Thursday of This Week.

It has practically been decided to hold a two days' race meeting next week. The racing will commence at 1 p. m. on Wednesday and Thursday next. The original idea was to have a one day meeting and start at 10 a. m. The card of races arranged is sufficient to provide two half days of rattling sport.

In view of racing starting on Wednesday, entries will close on Monday night at 8 o'clock at the Hawaiian Hotel.

Work done at the track yesterday was mostly of a light description in anticipation of speed burning to-day.

Vioris registered a capital gallop in getting to the end of the mile in 1:52.

Lawrence H. galloped a mile very strongly. He goes nicely and should run forward in any race for which he may be wanted.

Amarino negotiated a mile at a two-minute gait.

Long's Kalihii was worked several slow heats.

Octoroon was jogged on the road.

Weller exercised on the track and Antidote and Sir Cassimir on the road.

Billy McCloskey galloped four miles. He needs all the work that can be given him.

Virgie A., Frank S. and General Cronje galloped two slow miles.

"Abby" went to town to be clipped.

Charlie Bellina has a sorrel mare named Lucy D. Bell, by Iris out of an Echo mare. She came to the islands quite recently and yesterday was taken to the track for the first time. She stepped a mile so handily that Charlie went in her in the three minute class.

Lieutenant Hancock is the owner of a nice looking bay mare by Rysdyck's Hambletonian out of Agnes B. She is said to be quite fast and if looks go for anything should be able to travel some.

Old Amarino was racing here in 1891 in which year he won the Futurity run over six furlongs. In 1892 Bob Ballentine purchased him and has had him ever since. During the season of 1895 and 1896 Amarino was raced at the Coast but the best he could do was to run second in a big field of horses at Ingleside. The cold weather made him sick. He is by Kealia-out of Amandine and was bred on Hawaii by Colonel Spalding. He will be entered in both Hawaiian bred races.
